What is MUJI?

“NO LABEL. QUALITY GOODS”

MUJI is derived from its Japanese name ‘Mujirushi Ryohin’ which means ‘no label quality goods’. The brand launched in Japan in the 1980s with its no label, value-led, less is more concept.

MUJI is a renowned producer of stylish, functional and affordable quality goods that are relevant to all aspects of urban living, whether at work, rest or play.

Today MUJI has more than 800 stores worldwide and offers various consumer related products, including; household goods, stationery, travel accessories, beauty products and fashion.

In the Middle East, MUJI has stores in Kuwait, UAE, KSA, Bahrain, Qatar and Oman.

MUJI Philosophy & Values

Philosophy

- 1. Selection of materials:**
We use many recycled materials, with an emphasis on quality. This enables us to create low-priced, high-quality products.
- 2. Streamlining processes:**
Processes that have no bearing on a product's quality such as sorting, sizing, and polishing are eliminated. Focusing on true quality, MUJI's processes eliminate waste and reduce costs.
- 3. Simplification of packaging:**
MUJI seeks to highlight products' natural colors and shapes. MUJI products appear in simple packaging bearing only product related information and a price tag.

Values

- 1.** MUJI is not a brand whose value rests in the frills and "extras"
- 2.** MUJI is simplicity – but a simplicity achieved through a complexity of thought and design
- 3.** MUJI's streamlining is the result of careful elimination of gratuitous features and design unrelated to function
- 4.** MUJI, the brand, is rational, and free of agenda, doctrine, and "isms"
- 5.** MUJI aspires to modesty and plainness, to appeal to a wide group of people

Storage / Buri, Rattan & Cotton Linen

Interior Advisor's Recommendation.

The standard dimensions of modules are based on "shaku", which is a unit of measurement used in the construction of Japanese homes. These dimensions are used in a wide variety of items ranging from large furniture to small storage items. For example, the height of a unit shelf is based on the height of a "kamoi" (lintel) or door, and shelf width is based on the width of a half "ken" (91 cm), so that they can fit neatly within the width of 1 "ken" (182 cm), between two columns.

Unit shelf module dimensions "175 cm and 86 cm"

The 175 cm height corresponds the height of doors in Japanese homes. The 86 cm width is based on the "ken" (182 cm), which is a unit of measurement used in the construction of Japanese homes. "Outer width 86 cm, inner width 84 cm" which is slightly less than a half "ken" (91 cm), is a standard dimension for MUJI products.

Storage item module dimensions "37 cm and 26 cm"

Storage item modules are sized to fit neatly in storage furniture with dimensions of 175 cm and 86 cm. The module dimensions of 26 cm and 37 cm, which are designed to fit on shelves, are based on the inside dimensions of shelves (W 80 x H 35 cm).

Compatible storage items

These modules fit in a unit shelf or stacking shelf.

Country of origin of Rattan Basket

Rattan baskets sold by MUJI are made in Thai Binh province, northern Vietnam. Thai Binh province is a peaceful place with rice fields and free-range cows, buffalos, and chickens. In addition to farming, the area is also famous for its handicrafts, particularly items of woven rattan and bamboo.

Making a Rattan Basket

The rattan, about 3-5 cm in diameter, must first be split into 5-9 mm strips before it can be used to make a basket. The rattan baskets are woven by hand, by farmers. This rattan basket takes a long time to weave, only 1-2 can be made in a day.

These casters can be easily attached to the bottom of the following polypropylene cases by inserting the connectors into the holes.

* Using the casters increases the total height by approx. 3.8 to 4.2 cm (exact height-increase depends on the case used).

* Do not use casters on tatami, cushion floors, or other soft flooring in order to prevent damage to the floor.

⚠ Please note the set cannot be disassembled again once it has been put together.

Oak

Used for furniture and floorboards for many years, oak which is hard, solid and durable is a perfect material for long-lasting furniture. The delicate and soft expression creates furniture with a mellow impression.

Patterns called "tiger grain" which resemble the pattern of tiger stripes and its delicate and gentle grain are characteristics of oak. The look of oak is enhanced as the material ages over time.

Walnut

Walnut is a well-known wood material that has been used for furniture since olden times and is still used today for high-end furniture and crafts. It features a beautiful surface and little warping.

Ageing of the wood can be enjoyed as the wood contains a moderate amount of oil which provides glossiness and allows the wood to age well. Walnut is treasured as one of the world's three major wood types together with teak and mahogany.

Stacking Shelves

Free to be used horizontally or vertically, stacking shelves are a strong and attractive storage solution. A large number of our storage products will fit into stacking shelves, for the ultimate modular storage solution. Stacking shelves use metal rods inside and are available in both oak and walnut colour.

Basic configuration of stacking shelf

The units can be easily linked by connecting the steel pipes inside the dividers and fastening them with the bolts. MUJI's storage items fit nicely in these shelves. Original storage furniture can be freely created by combining a basic set with additional sets.

By combining a basic set with additional sets, you can extend the shelves vertically and horizontally to achieve your desired configuration.

This item is only available in depth 28.5 cm. You can choose from three heights.

Example: You can choose from two block widths.

Example of Usage

Combination of differing tiers

Example of combination and withstand load

Narrow 5 shelf × 1 + Narrow 5 shelf Add On × 4

A combination method consisting of a shelf in the upright direction and additional units linked to the side.

Withstand load: 150 kg total = 60 kg × 5 units ÷ 2

Total withstand load when shelves are combined = Withstand load of set × number of units ÷ 2

Narrow 3 shelf × 1 + Narrow 3 shelf Add On × 1

A combination method consisting of a shelf placed sideways and additional units linked on top.

Withstand load: 40 kg total = 40 kg × 2 units ÷ 2

Total withstand load when shelves are combined = Withstand load of set × number of units ÷ 2

Combination of items with differing widths

These sofas are carefully designed for seating comfort and can be freely combined into a variety of configurations.

The seat cushions are constructed from a concave moulded urethane base topped with a bag filled with crushed urethane foam, for plush seating comfort.

The units can be combined to create a sofa set for a large living room, or they can be used individually as a compact sofa. You can freely select the combination that best suits your lifestyle and living space.

Whether your preference is to use a single module as a roomy seat for one person, or combine multiple modules to use as a complete sofa, you can select a combination that fits your living environment.

Beads Sofa

The beads sofa changes its shape freely to fit your leisure position. Filled with micro particle beads, the sofa wraps around you for comfortable sitting. You can enjoy different seating comfort depending on how the sofa is placed.

Sitting on a "vertically placed" sofa

The sofa wraps around the lower back and neck to support any posture that one wishes to relax in. Perfect when reading or watching TV.

Sitting on a "horizontally placed" sofa

The sofa spreads in a circular manner to allow the body to sink in deeply and be supported. Perfect for taking a nap.

- During the course of use, the beads may settle and cause a slight variance in thickness.

-Slight shrinking of the cover may occur by dry cleaning.
- The Beads Sofa cannot be washed.

-The sofa cannot be used alone. Be sure to use it with a cover.

Storage Bed

This single bed features a storage space equal to that of two wide 4-drawer chests. Store everything from daily-use clothing to suitcases and comforters.

Example storage
Example storage under a Double bed

Open space
A storage space is also provided behind the drawer space. In the space under Double size, you can store long or large objects, such as rugs, skis, duvets, and carry cases.
* Bottom board is not provided under the open space.

Ventilation holes are made below the open space to allow moisture to escape.

Drawers
In the drawers, available for all sizes of beds, you can store daily-use clothing and beddings.

Bed board is made of wood slats that reduce the dust getting into the storage compartment.

* Example combination: mattress is sold separately.

Outer shell: 100% polyester, down-proofed finish
Filling: 80% down, 20% feather
Fill power: 350
Using free ranged, humanely raised gray duck feathers, we have created this lightweight and compact duvet.

Difference between down and feathers

Down
Light, soft, and heat retaining feathers which look like the fluff of a dandelion mostly found around the chest and stomach of waterfowls.

Feather
The portion which is commonly referred to as a feather which has a curved shaft and elasticity.

Natural grey colour

Many grey geese are found in quiet rural areas of Ukraine. Though domesticated long ago, the grey goose retains the dark colour reminiscent of wild migratory geese. The birds roam freely in a natural environment. When fully grown, the grey goose is bigger than a duck and has excellent mobility. The warm and strong feathers of the grey goose are ideal for duvets.

The geese on the farm are fed corn in the morning and after that, they eat naturally growing grass and insects.

Families of geese congregate on nearby lakes and rivers in early spring.

The geese return to the farm in the evening.

Tableware

Acacia

MUJI Acacia serving ware is made in the Philippines. Acacia trees grow more than 50cm in diameter; so just one single tree yields a huge amount of wood. Hollowing out the tree takes a great deal of skill and is carried out by expert local craftspeople.
